

Keep it Clean!

Prepare for Boards... Infection Control

WHAT: Understand the Principles of Cleaning (formerly sanitation) and Disinfecting

WHY: Protect Yourself, Your Customers
AND...Pass Your Boards

WHEN: Every Client, Every Time

DID YOU KNOW?

- 2 oz of Barbicide® concentrate makes 34 oz of Barbicide®
- 1 oz of Barbicide® Plus concentrate makes 1 gallon of Barbicide® Plus

(Barbicide® Plus should only be used in states requiring a Tuberculoidal disinfectant)

BARBICIDE®

Find your state laws at www.barbicide.com/EducationCenter.

STEP ONE

Clean (formerly known as sanitize)

- Remove all visible debris from an item or surface—that includes hair!
- For surfaces (counters, chairs, flat irons, bowls)—use a surface cleaner like Ship-Shape® Liquid
- For shears, combs and brushes—use a comb and brush cleaner like Ship-Shape® Powder

STEP TWO

Disinfect (this important step protects you and your business from germs that cause illness)

- Select a hospital grade disinfectant like Barbicide® or Barbicide® Plus
- Mix disinfectant according to package directions
- Submerge items or spray surfaces—maintain CONTACT TIME (The amount of time an item or surface must stay moist with properly mixed disinfectant to be effective against pathogens listed on label.)
- Rinse submerged items and store in a covered container

STEP THREE

Change DAILY!
